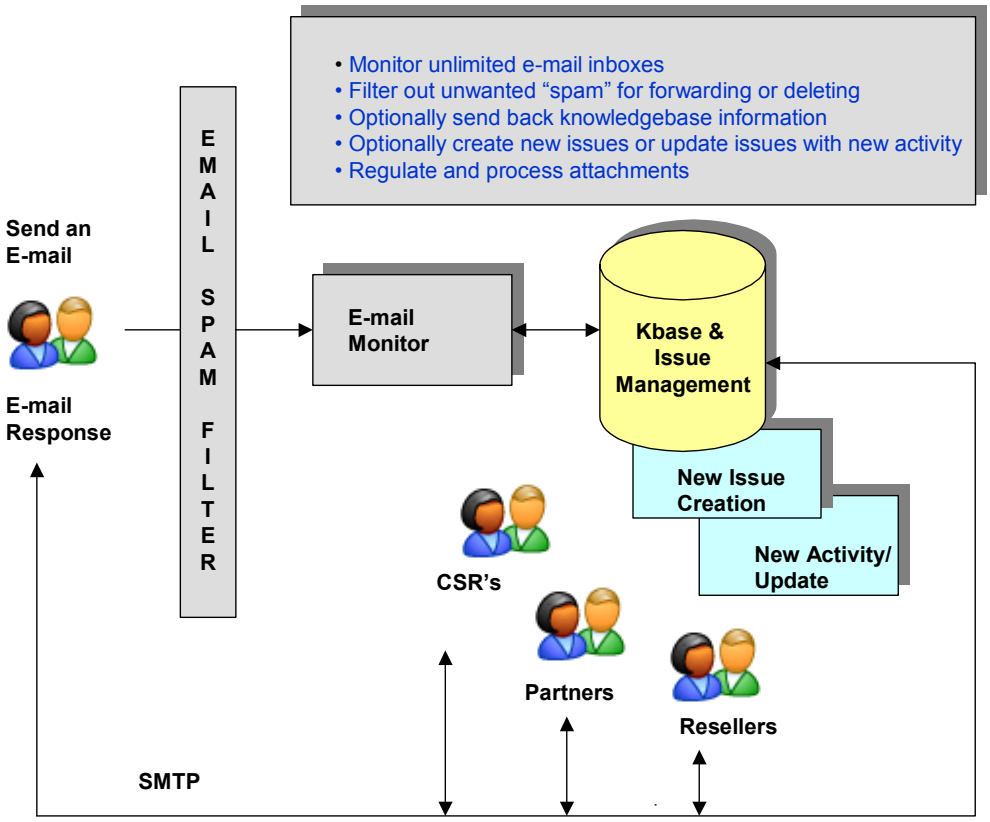
e-Mail Management™

e-Mail Response Management System

Effortlessly Monitor, Route, and Process incoming e-mail messages and eliminate annoying SPAM

- Monitor, route, and process incoming e-mail messages with complete 24x7 automation
- Automatically open new issues or update existing issues with new activity
- Block unwanted messages and harmful attachments from entering your organization



Why Use Monitoring?

e-Mail Monitoring can be used to automate a host of functions that are otherwise carried our manually. Use Monitoring to capture information for technical support or more information, such as inquiries from the Internet, sales leads, requests for free trials or demos, brochures, and so on.

Can you afford to wait?

Getting started with e-Mail Monitoring takes a few minutes and requires no special skills. Within hours traditionally cumbersome e-Mail will become powered by automated workflow resulting in greater productivity, organization, and report management.
